EXPERIENCE

General Assembly, Atlanta, GA

Full Stack Developer, Aug - Nov 2017

- A 12-week full-time development program focused on learning the skills to become a full stack developer.
- Learned the front and back end languages necessary to begin a successful career in web development.

The Flag Company Acworth, GA

Web Developer, March - April 2017

- Developed a user responsive website
- Assure that all user input is validated before submitting to back-end

Buddha Group Inc

Proprietor, Nov 2008 - July 2015

- Managed daily store operations, monitor and order inventory, cash flow and customer service.
- Trained all new employees in compliance with state laws and rules of Georgia lottery and Slot machine.

PROJECTS

CRM Application, January - May 2016

- Developed CRM system using Visual Studio C# application to keep track of inventory, sales, and customer information.
- SRS document, Gantt chart, UML diagram, database schema, and Unit Testing.

Web Development Project, August - December 2016

- Developed a fully functional web page using HTML5 features including CCS3 and supporting JavaScript APIs.
- Apply and integrate AJAX techniques to create asynchronous applications.
- Integrate data and services provided as standard web APIs and data formats.
- Key technologies: AJAX, REST, SPA, JavaScript, JSON, jQuery, Google Books APIs.

Big Data Hadoop Anthem Security

(Capstone Project), January - May 2017

- Our team project is to investigate a fine-grained solution to protect Protected Health Information and Personally Identifiable Information. Currently data analysts are having to create two files based on the security level of the user viewing the data. Our team is tasked with finding a data-level solution to masking information and implementing access controls based on the permissions of the user accessing the data.

Full Stack Web Projects - General Assembly

August - November 2017

- Developed web applications using latest technologies like MERN stack and Ruby on Rails. Database technologies like PostgreSQL and MongoDB.
- Implemented RESTful routes, built fully functional CRUD web applications and deployed on Heroku.
